

SIBBM LECTURE & WORKSHOP

From Proteomics To... Beyond

23 Novembre 2017, ore 14:00

Università degli Studi di Torino

Molecular Biotechnology Center, aula Darwin -

Via Nizza 52 - Torino, Italy

SIBBM LECTURE

"A tale of proteomics, disease mechanisms & data mountains"

Angus Lamond

Centre for Gene Regulation and Expression, University of Dundee, UK

followed by

SIBBM WORKSHOP

"Synaptic interactome mining reveals p140cap as a new hub for PSD proteins involved in psychiatric and neurological disorders"

Annalisa Alfieri - Department of Molecular Biotechnology and Health Sciences - University of Turin

"PRMT1-dependent Arginine methylation regulates replication stress response through DNA-protein kinase"

Daniele Musiani - IFOM-IEO Campus - Milan

"Defining the in vivo RNA structurome"

Danny Incarnato - Epigenetics Unit - Italian Institute for Genomic Medicine (IIGM), Turin

Light refreshments will be served at the end
